

10/06/2022

## LONG WEEKEND & PUPIL FREE DAY

This long weekend is looking to be cold and wet. Please stay warm and safe especially if on the roads over the next few days.

Monday 13<sup>th</sup> June – No school, Queens birthday public holiday

Tuesday 14<sup>th</sup> June – No school, Pupil free day

We look forward to seeing the students again next Wednesday. Over the extra long weekend we hope students are reading every day to further develop their skills.

## COVID TESTS

As per the email yesterday, additional RAT screening tests have arrived. If you require additional tests please contact the school.

## Wellbeing & Inclusion Support Process

### Remind

The teacher reminds us of our school values and behaviour expectations.

### Redirect

The teacher helps us move our attention to something that helps us learn.

### Reset

The teacher helps us choose a strategy to get back to the green zone.

### Restore

The teacher helps us join in with our class again.

Our teachers and class mates are happy when we show the school values. Our teachers and friends help us so that we can learn and have fun at school.

## WELLBEING & INCLUSION PROCESS

Earlier in the year I shared our new process for supporting students both in the classroom and the yard. This new process of working with students to promote positive choices has already shown to reduce the number of poor choices being made by students.

The Zones of Regulation and our value of respect underpins this process and focuses on developing students ability to regulate themselves with teacher support.

A new poster has been designed to help students understand the process for managing their emotions and supporting positive choices at school.

This process may support parents with students at home, students are learning the language and following the steps to help regulate.

## **LAST DAY OF TERM**

Parents are reminded that our last day of Term 2 is Friday 24<sup>th</sup> June at 2.30pm.

Their Care will not be available these holidays due to planned works along the gym.

## **STAFFING UPDATE**

We warmly welcome Mrs Emma Cope to the school community. Mrs Cope re-joins our school from many years ago and is eager to work with students to develop life skills. Please make her feel welcome.

As we welcome Mrs Cope we say goodbye to Mr Jarryd Stirling who has been selected for another position at another school. Mr Stirling has been with us for three years and he now ventures off to the next stage of his career. Plans are being developed for his replacement next week.

## **CANTEEN REMINDER**

Parents are reminded to include the **students name** on orders and **grade**. Lately we have had several orders each Friday being placed in the box at the office and when they are checked there is either no grade or name. This makes it hard to locate the student at lunchtime and they are getting a late lunch.

Lunch orders will be provided on the last day of term.

## **GLASSES FOR KIDS PROGRAM**

Earlier in May a large number of students participated in the Glasses for Kids program provided by State Schools relief. Eleven (11) students received glasses and reports have all been sent home this week. We encourage parents to take their child for further eye testing if they have been referred to in the letter. This is important to support your child at home and at school.

Each year children should have their eyes tested to check for any concerns and glasses purchased if needed. The school can support any family through the ACE Foundation which will provide free eye testing and free glasses as needed. Please contact the office for a form.

## **NEW SPORT EQUIPMENT**

This week we have ordered lots of new sporting equipment for students and the PE department. Each area of the school will be equipped with soccer balls, basketballs, netballs, skipping ropes, hoola hoops and tennis balls that students can freely use at break times. It is important students return the equipment to the same location at the end of a break.

To support gross motor development we have ordered new equipment for the gym that students in the junior areas will use in PMP sessions. Developing gross and fine motor skills early is important to support further development as they grow.

Regards,

Ross Carlson  
Principal
